Objective

Software Engineer eager to solve real-world problems. Passionate about building efficient, maintainable and user-centric applications with a focus on testing and automating manual tasks to improve efficiency.

Experience

Junior Software Engineer , Jet2 Travel Technologies Pvt Ltd.	July 2024 – Present
<ul style="list-style-type: none">Developed business applications using power apps.Experienced in automating complex business workflows using power automate,,, enhancing operational efficiency and reducing manual efforts.Experience in designing databases using SharePoint as a backend.Involved throughout the project lifecycle, from requirement gathering and stakeholder discussions to solution design, development, deployment, and post-implementation support.	
Associate Software Engineer Intern , Akrity Computing	March 2024 - May 2024
<ul style="list-style-type: none">Delivered full-cycle software development and deployment for enterprise-grade applications using Ruby, Ruby on Rails, Javascript, HTML and CSS	
Software Engineer Intern , Persistent Systems	January 2023 - May 2023
<ul style="list-style-type: none">Delivered end-to-end software development and deployment support for enterprise-grade applications, applying best practices in SDLC, testing with JUnit, and version control using Git, while strengthening skills in Java and Spring Boot frameworks.	

Education

Dr. D. Y. patil Institute of Technology, Pimpri , BE in Computer Engineering	August 2019 – July 2023
<ul style="list-style-type: none">CGPA: 8.28/10.00	
Residential Junior College, Ahmednagar, Ahmednagar , HHS	August 2017 – March 2019
<ul style="list-style-type: none">Percentage: 71.69%	

Skills

Technical Skills: Java, C#, JavaScript, React.js, Node.js, Spring Boot, MySQL, Hibernate/JPA, AWS, Amazon Q Business, Copilot Agents, Low Code, Power Automate, Power Apps, SharePoint, Git, GitHub

Concepts & Architecture: Microservices, Object Oriented Programming (OOP), Linux, Dynamics 365 Finance , Data Modeling, Azure DevOps, REST APIs, Microsoft Dynamics 365, SDLC

Projects

Bank Account Management System

- Designed and developed a full-stack banking application with Spring Boot (backend) and React with TypeScript (frontend). Implemented features like account creation, balance inquiry, fund transfers, credit/debit transactions, and transaction history retrieval. Built RESTful APIs with proper exception handling and integrated MySQL for data persistence following microservices principles. Created a responsive front-end UI using React, HTML, and CSS for seamless user interaction.
- Tools used: Spring Boot, Spring REST API, Java, MySQL, Hibernate/JPA, Microservices, Maven, React, TypeScript, HTML, CSS, Postman, GitHub, OOP

Marathi Biodata Generator

- Developed a responsive Biodata Generator web application using React and TypeScript, featuring real-time document preview and phonetic typing support for multiple languages. implemented client-side PDF export functionality using html2canvas and jsPDF, ensuring high-quality, printable output directly from the browser.
- Tools used: React.js, TypeScript, Vite, jsPDF, html2canvas, CSS, Responsive Web Design.
